

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JUNE 19, 2000 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

New large fires were reported in the Western Great Basin, Eastern Great Basin and Southern Areas. Initial attack activity was moderate in the Great Basin, Southwest, California, and Southern Areas. Containment goals were reached on three Southwest Area fires. The National Interagency Coordination Center mobilized airtankers, a lead plane, infrared aircraft, engines, crews, and miscellaneous overhead. Very high to extreme fire indices were reported in Arizona, New Mexico, Nevada, Utah, Colorado, California, Kansas, Florida, Georgia, and Mississippi.

ROCKY MOUNTAIN AREA LARGE FIRES:

An Area Command Team (Meuchel) is assigned to manage the large fires in Colorado.

HIGH MEADOW, Colorado State Forest Service, Pueblo Dispatch Center Counties. A Type I Incident Management Team (Hart) is assigned. The fire is 35 miles southwest of Denver near Pine, CO. Damage assessment has revealed an increase in the number of structures lost. Large areas of unburned fuels still remain inside the fire perimeter, presenting the threat of long-range spotting if those areas begin active burning. High winds and low relative humidities are forecast today, due to a passing cold front.

BOBCAT, Arapaho-Roosevelt National Forest. A Type I Incident Management Team (Carvalho) is assigned. This fire is burning in grass, brush and timber 12 miles west of Loveland, CO. Strong winds are expected on the fire today. If firelines hold, containment goals should be met by the end of shift. Demobilization of some resources is underway.

SOUTHWEST AREA LARGE FIRES:

An Area Command Team (Edrington) is assigned to manage the Cerro Grande and Viveash fires.

CERRO GRANDE, Bandelier National Park. Two Type II Incident Management Teams (Furlong and Ostman) are assigned. The fire is near Los Alamos, NM. Crews continue to implement rehabilitation projects. Concerns have been expressed regarding the working environment in relation to Los Alamos

Laboratory. Based on monitoring and information provided by the lab, the Area Command Team believes there is no reason current assignments should not continue.

VIVEASH, Santa Fe National Forest. A Type II Incident Management Team (Rios) is assigned. This fire is burning in ponderosa pine and mixed conifer five miles northwest of Pecos, NM. Rehabilitation efforts include aerial seeding, contour felling and placing log erosion barriers. Continued progress is being made with suppression and mop-up activities.

POT MOUNTAIN, Taos Field Office, BLM. This fire is burning in pinyon-juniper and sagebrush 30 miles northwest of Taos, NM. Demobilization of excess resources is occurring.

AZS = Arizona State Land Department

WESTERN GREAT BASIN AREA LARGE FIRES:

HOGAN, Elko Field Office, BLM. The fire is 35 miles west of Wendover, NV. Driven by strong winds, the fire spread rapidly in grass, sagebrush and pinyon-juniper. It is burning in a wilderness study area.

EASTERN GREAT BASIN AREA LARGE FIRES:

BULLION, Salt Lake Field Office, BLM. This lightning-caused fire is burning in grass and sagebrush 60 miles southeast of Wendover, UT. High winds caused the fire to grow rapidly. A burnout operation is being conducted from the roads. Wildlife habitat is threatened.

SOUTHERN AREA LARGE FIRES:

HELMS ROAD, Florida State Division of Forestry. This fire is near La Belle, FL, 25 miles east of Fort Myers. The fire has caused damage to one house, several outbuildings and one vehicle. High winds and long range spotting have hindered suppression efforts. Containment was expected last night.

CAMPGROUND, Florida State Division of Forestry. This lightning-caused fire is near Lakeland, FL. Fire activity has been minimal. Crews continue to mop-up and monitor containment lines. Containment was expected last night.

LOUISE, Florida State Division of Forestry. This is a complex of four fires which are burning near Gainesville, FL. Mop-up and patrol of containment lines continue.

NORTHERN CALIFORNIA AREA LARGE FIRES:

BERRYESSA, Lake-Napa Unit, California Department of Forestry. A State Type I Incident Management Team (Holmes) is assigned. The fire is burning in steep, rugged terrain 36 miles west of Sacramento, CA. Crews on the north and west divisions are cold trailing. Fireline rehabilitation operations are in progress. Demobilization of surplus resources has begun.

OUTLOOK:

*** A RED FLAG WARNING IS POSTED FOR SOUTHEAST IDAHO FOR STRONG WINDS ***

*** A FIRE WEATHER WATCH IS POSTED FOR EASTERN COLORADO FOR STRONG WINDS, LOW RELATIVE HUMIDITIES AND DRY LIGHTNING ***

A trough moving southeast through the Great Basin will bring cooler and breezy conditions. In Nevada, skies will clear today. Utah, Arizona, New Mexico, and Colorado will be partly cloudy with scattered showers and thunderstorms. Some thunderstorms in eastern Colorado could be dry. Temperatures will be in the high 70's in the mountains and up to the 100's in the lower elevation deserts. Winds will be southwest to northwest at 15 to 25 mph with gusts up to 40 mph. Minimum relative humidities will be 10 to 20 percent in Arizona and New Mexico, and 15 to 30 percent in Utah and Colorado.

Florida will be partly sunny with showers and thunderstorms likely. High temperatures will be from the mid 80's to the low 90's. Winds will be southeast to southwest at 5 to 15 mph. Minimum relative humidities will be 45 to 55 percent.

California will be sunny, hot and dry. High temperatures will range from the 70's along the coast to 105 in the deserts. Winds will be southwest to northwest at 10 to 20 mph. Minimum relative humidities will be 10 to 20 percent.
