The United States Coast Guard Navigation Information Service (NIS)

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <http://www.navcen.uscg.gov/gps/status/default.htm>.

In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, Email: webmaster@smtp.navcen.uscg.mil, or on the World Wide Web at: <http://www.navcen.uscg.gov>

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

FLORIDA-PALM SHORES TO WEST PALM BEACH: WAMS ANNOUNCEMENT.

The Coast Guard is conducting a Waterway Analysis and Management System (WAMS) study of Fort Pierce Main Ship Channel. The study focuses on the area's aid to navigation system, waterborne commerce, marine casualty information, port/harbor resources, emergency response plans, communication capabilities and future development projects. Any interested company or individual wishing to provide comments or participate in a user survey should contact the Coast Guard by September 1, 2008. Contact Information: Commander, Sector Miami, 100 MacArthur Causeway, Miami Beach, FL, 33139, Attn: CWO2 M.A. Bridges at (305) 535-4311. E-mail to Martin.A.Bridges@uscg.mil.

NOAA's RASTER NAVIGATIONAL CHARTS AND UPDATES VIA THE INTERNET

NOAA provides free, Raster Navigational Charts (RNCs) and free weekly RNC updates via the Internet (<http://nauticalcharts.noaa.gov/mcd/Raster/Index.htm>) and through certified redistributors. For a limited period beginning June 15, 2008, RNCs will not be updated for either Notices to Mariners or for new editions of the nautical charts. This temporary interruption of service is due to a change in RNC production systems. Full RNC service will resume when reliable production is restored. In the interim, continuously updated NOAA Print on Demand charts (www.OceanGrafix.com), traditional printed charts, and free Electronic Navigational Charts and updates (<http://nauticalcharts.noaa.gov/mcd/enc/index.htm>) will continue to be available.

Hurricane Season

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed.

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

- (a) HURRICANE WATCH - a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and
- (b) HURRICANE WARNING - which indicate that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricane and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

GPS INTERFERENCE TESTING (Ref: SPC 2007-150), CAPE CANAVERAL , AFS, FLORIDA. (Updated as of May 16, 2008)

The GPS Navigational Signal maybe unreliable from October 24, 2008 to April 24, 2010, due to interference testing on GPS frequencies used in shipboard navigation and handheld systems. GPS systems that rely on GPS, such as E-911, AIS and DSC, may be effected within a close proximity of position 28-28-10.5N 080-34-44W. During this period GPS users are encouraged to report any GPS service outages that they may experience during this testing via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN's web-site's "GPS a problem worksheet" at www.navcen.uscg.gov.

LNM: 13/08

HIGH FREQUENCY RADIOTELEX (SITOR) AMVER AND OBS SERVICE DISCONTINUED FROM COAST GUARD CAMSLANT AND COMMSTA KODIAK

The Coast Guard will terminate high frequency (HF) radiotelex (SITOR) services from Communications Area Master Station Atlantic (CAMSLANT - NMN) and Communications Station Kodiak (NOJ) used for the collection of AMVER ship position reports and of meteorological observations effective 2400Z March 31, 2008. HF radiotelex services from Communications Area Master Station Pacific (CAMSPAC - NMC/NMO) and Communications Station Guam (NRV) will continue until at least September 30, 2008.

AMVER and NOAA meteorological reports will continue to be received at no charge through ShipCom HF radiotelex (NBDP) service via stations KLB near Seattle, WA, and WLO near Mobile, AL, and NOAA's SEAS (Shipboard Environmental (data) Acquisition System) program through Inmarsat C. AMVER reports may also be sent at no charge through Globe Wireless.

Broadcasts of maritime safety information by HF SITOP (HF NAVTEX) will not be affected by this action.

LORAN-C OPERATIONS, LORAN DATA CHANNEL (LDC) RESEARCH

(A.) LORAN Stations Jupiter, Florida (7980-Y), Las Cruces, New Mexico (9610-X), and Middletown, California (9940-X) will be on air testing the Loran Data Channel (LDC) uninterrupted until further notice.

(B.) LORAN Stations Seneca, New York (8970-X), Gillette, Wyoming (8290-X), and Grangeville, Louisiana (7980-Y) will be on air testing LDC between 0800 and 1500 local time Monday through Friday.

(C.) LORAN Stations Dana, Indiana (9960-Z) and George, Washington (5990-Y) are expected to begin testing LDC in the near future.

(D.) The test broadcast will use pulse position modulation of a ninth pulse added one thousand microseconds after the standard pulse group. Throughout the test period the signal will meet all service performance parameters published in the 1994 specification of the LORAN-C signal. User should not experience any tracking errors or service interference from this test broadcast. Users will be notified of any changes to the test schedule and when the testing is complete.

(E.) LORAN users are encouraged to report any LORAN service degradation or outages that may experience via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN web sites report a LORAN problem worksheet at www.navcen.uscg.gov. Additional information on the LORAN data channel and the 1994 LORAN-C signal specification may also be found at this website.

(F.) Address inquiries to the chain operations control officer CWO S. McDonald of the northeast and Great Lakes U.S. LORAN-C Chains at (703) 313-5880 or LT. Boyd for the Southeast and South Central U.S. Chains at (703) 313-5873.

(G.) Current LORAN-C status is available 24 hours per day through internet address www.navcen.uscg.gov.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Section Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States.

For Complete Text of Message See Enclosure (3).

NAVAL PROTECTION ZONES

The U. S. Coast Guard has established protection zones around U. S. Naval vessels within U. S. navigable waters. Naval vessels protection zones are established within 100 yards of any U. S. Naval vessel. This includes any vessel owned, operated, chartered, or leased by the U. S. Navy or under the operational control of the U. S. Navy.

Vessels within 500 yards of a U.S. Naval vessel shall operating at the minimum speed necessary to maintain a safe course and proceed as directed by the official patrol. Mariners may contact the U.S. Coast Guard on VHF Channel 16 regarding this message.

DATES OF LATEST EDITIONS, NAUTICALS CHARTS AND MISCELLANEOUS MAPS

The Dates of Latest Editions, Nautical Charts and Miscellaneous Maps, dated October 1, 2007, published by the National Ocean Service, is available for issue. It may be obtained free by mail from the FAA/National Aeronautical Charting Office, Distribution Division AVN-530, 10201, Good Luck Road, Glenn Dale, MD, 20769-9700, by telephone at 1-800-638-8972 or from your local authorized nautical chart sales agent.

This is a quarterly publication listing the most recent editions of nautical charts, miscellaneous maps and publications relating to navigation, weather, etc. with brief descriptions and up-to-date prices for most of the publications listed. Much of this information may also be obtained online at: <http://chartmaker.ncd.noaa.gov/mcd/dole.htm>

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

Florida Atlantic University, Center of Excellence in Ocean Energy Technology (CEOET), Dania Beach, Florida, has deployed/installed one (1) Acoustic Doppler Current Profiler (ADCP) buoy offshore Hollywood, Florida.

The approximate positions of the ADCP buoy are:

26 deg 1.5N 079 deg 50.25W in 325 meters of water

The 325 m ADCP buoy measures 45" in diameter and will be suspended approximately 8 meters from the ocean floor. The 325 m buoy is connected to a 4 meter wire cable to an acoustic release and a steel clump anchor weighing approximately 3000 lbs.

Both ADCP buoys will be recovered by September 1, 2008 by firing the acoustic release. Both steel clump anchors will be abandoned in place. For further information please contact Ms Shirley Ravenna at (954) 924-7173.

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – ST JOHNS RIVER TO TOLOMATO RIVER – MCCORMICK BRIDGE: Bridge Construction.

Construction of the new McCormick (Beach Boulevard/SR 90) Bridge, Intracoastal Waterway mile 747.5, Jacksonville Beach, Duval County, Florida will begin in December 2006 and will continue until March 2009. A barge will be in the immediate vicinity of the bridge and may be in the navigable channel as needed.

The U.S. Captain of the Port Jacksonville advises that there will be periodic channel restrictions at the B.B. McCormick/Beach Boulevard Bridge for the next six to eight weeks. During that time mariners can generally expect 30 feet of horizontal clearance. Vessels needing additional clearance should contact Superior Construction Inc. at (904) 223-5076 or the tug tender on-scene, to request safe passage. Your request should be accommodated in approximately 30 minutes, based on operations.

The Captain of the Port advises all mariners that the federal channel beneath the McCormick Bridge, mile marker 747 on the Intracoastal Waterway, will be closed daily Monday through Friday from 7:00 a.m. to 5:00 p.m. from June 9 until June 27, 2008. A one hour channel opening will occur mid-day, every day, between the hours of 12 noon and 1:00 p.m. The bridge will open for declared emergencies. Vessels should contact the Tug ANNA on VHF Channel 13 and 16 for additional information on construction schedules. MSIB 10-08 was attached to Local Notice to Mariners 22-08, enclosure 10.

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – SPANISH BOULEVARD BRIDGE: Bridge Repairs.

The Coast Guard is changing the operating regulation of the Spanish Boulevard Bridge, Atlantic Intracoastal Waterway mile 1044.9, Boca Raton, Palm Beach County, Florida, due to repairs. This work will require single-leaf operation on the hour and half-hour with a three hour advance notice to the bridge tender for a double-leaf opening. The vertical clearance will be reduced by five feet due to the placement of containment equipment. This regulation will start at 8:00 a.m. on June 15, 2008 and continue until 6:00 p.m. on December 8, 2008. The bridge tender can be contacted at 561-395-5417 to request a full opening. In case of emergencies the bridge will open as soon as practicable.

TEMPORARY LOCK CLOSURES

OKEECHOBEE WATERWAY, FLORIDA

1. Mariners are hereby notified of the following temporary closures to navigation locks located on the Okeechobee Waterway. The closures are necessary in order to install Manatee Protection Systems. In order to expedite this operation, we will be using a compressed schedule to open the waterway by Labor Day weekend.

<u>LOCK</u>	<u>CLOSE</u>	<u>OPEN</u>
Port Mayaca	7 July 2008	29 August 2008
St. Lucie	14 July 2008	29 August 2008

2. The navigation lock at Port Mayaca will be closed to traffic at 0600, 7 July 2008 and reopen to traffic at 0600 on 29 August 2008. The navigation lock at St Lucie will be closed to traffic at 0600, 14 July 2008 and reopen to traffic at 0600 on 29 August 2006.

3. Navigation interests are urged to take the closures into consideration when planning their operations. Every effort will be made to reopen the locks to navigation at the earliest possible date prior to each scheduled opening.

4. For additional information regarding these issues and others may be obtained by visiting the website at www.saj.usace.army.mil and select NAVIGATION PROJECTS then select NAVIGATION BULLETINS AND LOCK CLOSURE INFORMATION or by contacting the US Army Corps of Engineers South Florida Operations Office, at (863)983-8101.

The commercial anchorage area is NNE of Port Everglades Lighted Buoy 2 (See 110.186, chapter 2, for limits and regulations.) **All commercial vessels planning to use the Port Everglades anchorage, whether bound for Port Everglades or not, are required to provide the U.S. Coast Guard with an advanced notice of arrival** (See 160.212, chapter 2, for regulations.) Vessels using this anchorage must report their positions and time of anchoring to the Port Everglades

Harbormaster on VHF-FM channel 14. No vessels may anchor in a "dead ship" status (i.e. propulsion or control unavailable for normal operations) without prior approval from the Coast Guard Captain of the Port (COTP). In addition, vessels are not permitted to anchor for more than 72 hours without prior COTP approval. Vessels shall request approval from the USCG COTP via the Port Everglades Harbormaster on VHF-FM channel 14. The anchorage is in close proximity to three (inner, middle, and outer) reefs that run along South Florida's coast. The anchorage area has charted soundings ranging from 125 feet to more than 500 feet. The depth of the western side of the anchorage area averages approximately 125 feet. The bottom type in the anchorage consists of a sand, mud, and coral rubble mixture that does not provide adequate holding during adverse weather. There are also minor obstructions in the anchorage area that are mainly discarded spools of cable; these may be annotated on the chart as obstructions. The close proximity of the anchorage area to the shallow reefs requires vigilance by vessel captains while piloting and anchoring in the area. Violent, unpredictable winds in excess of 50 knots can be associated with local thunderstorm activity. Upon the approach of thunderstorms from any direction or in sustained wind conditions of 25 to 30 knots from NNE through SSE directions, all vessels in the anchorage ground are strongly advised to have engines on standby and be prepared to vacate the anchorage. It is highly recommended that vessels leave the anchorage and head to sea when sustained winds in excess of 30 knots are blowing from NNE through SSE directions. A proper anchor watch

is vitally important with the vessel's position being checked frequently and VHF-FM channels 14 and 16 continuously monitored. Although not required, pilotage to the anchorage is available upon request and is strongly recommended for masters who are unfamiliar with the Port Everglades anchorage. Anchoring south of the entrance channel by vessels with a draft in excess of 12 feet is prohibited. (See **334.480**, chapter 2, for regulations.) The USCG COTP may close the anchorage and direct vessels to depart during periods of adverse weather or at other times as deemed necessary in the interest of port safety or security.

TEMPORARY LOCK CLOSURES

OKEECHOBEE WATERWAY, FLORIDA

1. Mariners are hereby notified of the following temporary closures to navigation locks located on the Okeechobee Waterway. The closures are necessary in order to install Manatee Protection Systems. In order to expedite this operation, we will be using a compressed schedule to open the waterway by Labor Day weekend.

<u>LOCK</u>	<u>CLOSE</u>	<u>OPEN</u>
Port Mayaca	7 July 2008	29 August 2008
St. Lucie	14 July 2008	29 August 2008

2. The navigation lock at Port Mayaca will be closed to traffic at 0600, 7 July 2008 and reopen to traffic at 0600 on 29 August 2008. The navigation lock at St Lucie will be closed to traffic at 0600, 14 July 2008 and reopen to traffic at 0600 on 29 August 2006.

3. Navigation interests are urged to take the closures into consideration when planning their operations. Every effort will be made to reopen the locks to navigation at the earliest possible date prior to each scheduled opening.

4. For additional information regarding these issues and others may be obtained by visiting the website at www.saj.usace.army.mil and select NAVIGATION PROJECTS then select NAVIGATION BULLETINS AND LOCK CLOSURE INFORMATION or by contacting the US Army Corps of Engineers South Florida Operations Office, at (863)983-8101.
