

Web-based Energy Codes Training The Next Step?

Ruth Taylor
Pacific Northwest National Laboratory
2003 Energy Codes Workshop

Why is Training so Important?

- Critical to Code Compliance & Implementation
 - Many building professionals know little about energy code requirements.
 - Energy codes are seldom a high priority for builders or code officials.
 - Training can help building professionals understand code requirements in the context of building physics and the entire construction process.

training activities

The Problem

- Training needs are increasing as funds are decreasing!

SEP Grants for Training

How Can Web-based Training Help?

- More cost-effective than traditional stand-up training.
- Accommodates the hectic schedules of most building professionals.
- Centralized resources (via the internet) can be shared by states to leverage limited training funds.

BEC User Preferences

How do you typically get energy code information?

What is Web-based Training?

- Online Interactive Web Casts
- Self-paced Online Modules
- Online Training Videos
- Online Searchable Energy Codes Database

On-line Training in the Construction Industry

- [ICC Code Campus](#) - Code Officials
- [Build IQ University](#) - Builders
- [AIA eClassroom](#) - Architects
- [AEE Online Seminars](#) - Energy Engineers

Is There a Solution?

- Can we leverage funds to train more building professionals with less money?

Centralization of Training Tools

- On-line Training Videos
- Self-Paced Training Modules
- National Web Casts

Generic tools based on national codes can be supplemented or customized for state specific codes or regional climate conditions.

Centralization Idea

BEC Online Resource Center

➤ Tools for Users

- searchable database of energy codes information
- graphics and video clips (viewed online or downloaded)
- related articles, websites and other resources

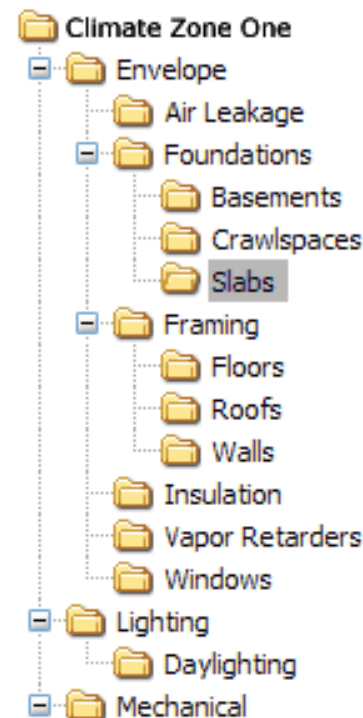

➤ Tools for Trainers

- Articles, graphics, video clips etc. can be saved for training presentations or resource manuals

Res Code -> Envelope -> Foundation -> Slab

Article # 68
Title Perimeter Slab Insulation

Description

Why is perimeter slab insulation so important?

Solution

A substantial amount of heat is lost through an uninsulated slab, resulting in cold, uncomfortable floors. Even if the foundation is insulated vertically under the slab, heat is still lost from the slab edge. See graphic.

Feedback Card

Web-based Training Interest Survey

2003 National Workshop on State Building Energy Codes

Does your agency currently use (or have plans to use) any of the following online training tools? (please check all that apply)

	Currently Use	Plan to Use
Online PowerPoint Presentations	_____	_____
Self-paced Online Training Modules	_____	_____
Interactive Web Casts	_____	_____
Online Training Videos	_____	_____
Searchable Energy Codes Database	_____	_____
Other _____	_____	_____

Which tools do you think would be the most useful to energy code users in your area?

	Most Least				
Online Power Point Presentations	5	4	3	2	1
Self-paced Online Training Modules	5	4	3	2	1
Interactive Web Casts	5	4	3	2	1
Online Training Videos	5	4	3	2	1
Searchable Energy Codes Database	5	4	3	2	1
Other _____	5	4	3	2	1

Do you have any other thoughts about ways to reach code users with online training tools? (please use the back of this card to describe)
